

The satellite radio service is a subscriber service. I listen to it because I want to. I do not want anyone to change my service. Especially non-subscribers. Why should the NAB be allowed to control what I listen to. I am a trucker and have been a subscriber to XM radio for over 2 years. I rely on the info I get from XM in my daily performance of my duties, especially the local traffic and weather. Constantly traveling means, not knowing where to go on the am-fm dial for, or what time to tune in to hear this info. Having it on my XM at a single location playing all the time on that channel is a very valuable tool for which I pay a monthly fee. In other words...

DON'T MESS WITH MY XM////
